

**Adventures With Atoms and Molecules**  
**Chemistry for Elementary**  
(approx ages 8 - 11)

Leilani Melendez  
[Leilanimelendez5@gmail.com](mailto:Leilanimelendez5@gmail.com)

**Class Description:** This course will take the upper elementary age students on an adventure through Chemistry: exploring atoms, molecules, periodic table, compounds, elements... all things beginners need to know about Chemistry. Every week they will engage in a hands on experiment while understanding the why, how, what, and if.

They will need a Chemistry spiral notebook that we will make interactive in class, including vocabulary and diagrams. They will need Colored pencils, scissors, and glue.

**Textbook:** Masterbooks God's Design for Chemistry and Ecology
